

ALDEN

ATTENTION

We are looking to appoint permanent dealers, spread around Southern Africa to do sales and fitments of our range of Alden satellite dishes:

- Onelight automatic satellite dish – 65cm
- Gosat manual satellite dish – 65cm
- Orbiter automatic satellite dish – 85 cm

Orbiter automatic satellite, 85 cm, dish provides for more / better coverage in Southern Africa. All satellite dishes are fully DSTV compatible and operates purely on 12volt.

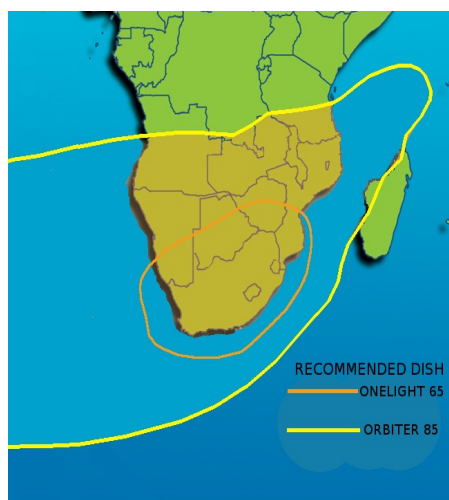

Very easy to install and fitment takes about 2 hours, depending on vehicle.

We will be offering dealer prices to all appointed dealers and we will assist dealers in advertising of all Alden products.

All possible dealer agents, with fitment centres, should consider this option, due to the fast growing need for these products on motorhomes and caravans.

Please consider this option and if you are interested, please get in contact with us at your earliest convenience.

Please be so kind to ask for Victor or Gillian when you phone the number below.

Please feel free to have a look at the Alden website for more information.
